

End User Challenge Is System Integrator Opportunity

Data transmission monitor is valuable and profitable.

Identify existing weakness

Improve product development cycle.

Predict potential Downtime Event

- **identify problem, deliver service before something wrong.**
- **preventive maintenance is better.**

Find reason after something wrong

data monitor and recorder can replay in data world.

**Bit error in data world is big trouble in real world. Monitor your raw data.
RAYON Technology can monitor your serial communication.**
